

novaAssist

Tempus Nova, Inc. developed the novaAssist tools set to help facilitate the migration process from Lotus Notes to Gmail. This tool set consists of several agents and processes that will allow your company to smoothly and efficiently migrate to Gmail.

There are several different tools contained in this toolset, but the highlights include:

- **novaForward** -A fully developed and tested forwarding agent that allows mail to seamlessly be forwarded from your Lotus Notes mailbox to Gmail. This also maintains integrity of addresses, calendar invites and headers throughout the process.
- **novaGroups** – This is a set of agents that allows you to quickly manipulate and export groups to ease the migration process to Gmail. This includes
- **novaQuery** – This is a reporting tool that allows you to pull information that is not available from the Google control panel into a Lotus Notes database.
- **novaAddress** –This tool exports all addresses out of your Public Name and Address Book and formats them correctly for easy import and configuration of Google Apps.

How Does It All Work?

Tempus Nova is the leading developer of the tools Google uses to migrate Lotus Notes data to Google. We have developed **novaAssist™**, powerful tool set that helps to fill in all the common gaps in a migration from Lotus Notes to Google Apps.
